Company Description: Freelancer Ethical Hacker at HackerOne.

Elevator Pitch

Hi there, my name is Pedro Osorio. I spent most of my life as a student-athlete. Starting the last few years, I started becoming very interested in cybersecurity, so I decided to learn the necessary skills to become an analyst. I studied on my own and worked my way up to achieve several cybersecurity certifications such as the Google one. I am looking for an entry level security analyst position since I want to put my knowledge into practice and help securing your company from all sorts of attacks.
